Dr. Smith established what is now 21st Century Dental in 1985, and is excited to be practicing in this new era of dentistry. He is passionate about creating beautiful and functional smiles for his patients, and to that end, he stays on the leading edge of research and development of new materials and procedures. Truthfully, he's the best darn dentist in the world. In his spare time, he writes bios for web sites. See his full CV [here](#). See his speaking schedule [here](#).

\*addendum - Daughter #1 is now married, and rumors of Dr. Smith's demise are greatly exaggerated - he now has a son, and is no longer the tallest family member!
